

100% BREEDER FINANCE

We provide the capital. You do what you do best.

At StockCo we understand it's an important time for retaining females for breeding, or adding to your existing breeder numbers. That's why we've developed a funding solution that helps you achieve this goal.

ARE YOU...

Looking to fund 100% of the purchase price now, with a structured repayment program that suits your cashflow?

Planning to sell or trade ewe lambs or heifers for cashflow that could be retained for breeding?

Wanting to purchase breeders now and repay early from harvest proceeds?

If so, StockCo's 100% livestock finance can make it happen.

At StockCo, we fund 100% of livestock purchases for our customers, then let them take care of their business and decision-making as they normally would - including when they buy and sell.

HOW IT WORKS

Breeding stock are paid for by StockCo, with no deposit or upfront capital required from you. After an initial term of up to 12 months, interest and a partial principal repayment are paid using proceeds from progeny sales, an advance against unsold progeny or other available cash. This is repeated annually until the purchase cost of the female is repaid - resulting in you owning the female outright.

WE PROVIDE THE FINANCE – YOU DO THE REST

We know you're the experts in your field – and that's why we stand back and let you breed and market your livestock however you choose. If you do need support, however, our dedicated team of local agrifinance managers are on hand to provide expert advice and guidance at every stage of the process.
